Subject: Recommendation Letter for MADERO Engineers & Architects.

Dear Ms. Alex-Rucker:

I am happy to attest for MADERO Engineers & Architects' professional services. As of today, MADERO has worked for me for almost four years at the Bush Intercontinental Airport's Central Plant and Utility Distribution System expansion project. During their assignment at the airport, MADERO has worked diligently, effectively, efficiently, constantly gone beyond the call of duty, and is therefore a great and essential team player of our Construction Project Management team.

MADERO's Construction Project Management services included but were not limited to: Construction Project Management; Field Engineering; Inspections; Management of the record set of project construction documents including specifications, drawings, and associated documents; Project Controls; QA/QC including technical analysis of construction documents and related contract correspondence; formulation of engineering design changes, technical evaluations, & recommendations to resolve emerging problems and conflicts with ongoing work activities; synthesized and recommended work scopes for proposed design changes; preparation of Work Change Directives including cost estimates; review and evaluation of testing reports against contract requirements.

I personally vouch and highly recommend MADERO Engineers & Architects to any company who is looking for Construction Project Management (CPM), including QA/QC, Inspection and Field Engineering services. Through the years, they have proven to be a fine, reputable and professional organization which I am proud to have on my CPM team. I am confident that MADERO will continue to deliver on time, below budget, and quality services to any client they will serve.

Sincerely,

Lawton Jackson
Sr. Project Manager
Houston Airport System
